

L. NITHISH KUMAR

JAVA FULL-STACK DEVELOPER • SYSTEMS ARCHITECT

Chennai, India • +91 8015855656 • agentnithish233@gmail.com • Portfolio • GitHub • LinkedIn

PROFESSIONAL SUMMARY

Performance-driven **Java Full-Stack Developer** with expertise in building enterprise-grade, low-latency, scalable web applications and microservices architectures. Highly skilled across the full software development lifecycle (SDLC), specializing in **Java 17/21, Spring Boot 3, Spring Security, REST APIs, Microservices, React 19, Next.js 16, TypeScript**, and **PostgreSQL**. Proven track record in designing event-driven systems (WebSockets/STOMP), local-first state persistence engines, ACID-compliant database schemas, and AI API integrations. Passionate about system design, clean architecture, automated testing, and delivering high-fidelity digital products.

TECHNICAL EXPERTISE

BACKEND ENGINEERING: Java (17/21), Spring Boot 3, Spring Security 6, Spring Data JPA, Hibernate ORM, RESTful APIs, Microservices, WebSockets (STOMP/SockJS), JWT Authentication, Connection Pooling (HikariCP).

FRONTEND ARCHITECTURE: JavaScript (ES6+), TypeScript, React 19, Next.js 16 (App Router), Tailwind CSS v4, Framer Motion, State Management (Context API, Redux), Virtual DOM Optimization.

DATABASES & STORAGE: PostgreSQL, Neon.tech, MySQL, SQL, LocalStorage API, Database Normalization, Index Optimization, Transaction Management (ACID Compliance).

DEVOPS & TOOLING: Git, GitHub, Docker Containerization, Vercel, Netlify, Render, GitHub Pages, Linux Shell, IntelliJ IDEA, VS Code, Postman, Vite.

AI & INTEGRATION: OpenAI API Integration, Natural Language Processing (NLP) Parsers, Structured JSON Prompt Engineering, n8n Automation Workflows, AI Agent Pipelines.

FEATURED SOFTWARE ENGINEERING PROJECTS

SubShield — Local-First SaaS Expense Command Center

React 19, Tailwind CSS v4, Framer Motion, LocalStorage

[Live Demo](#) | [GitHub Repository](#) | [Case Study](#)

- Zero-Trust Client Architecture:** Architected a 100% client-side subscription defense platform using React 19 and browser LocalStorage, eliminating cloud telemetry and ensuring zero-latency data persistence with 100% privacy.
- Interactive Bento Command Matrix:** Engineered a Bento UI featuring an automated **Portfolio Health Score algorithm (0-100)**, an interactive **Runway Optimization Simulator slider** for real-time forecasting, and Framer Motion spring physics.
- Sub-1ms Keyboard Command Palette:** Built a Vercel-inspired 3K fuzzy search Command Palette, dynamic brand logo resolution engine (Clearbit API), and 1-click cancellation assistant portal integration, reducing search latency to **under 1ms**.

QuantumOS — Spatial SaaS & AI-Powered Workspace

React, Spring Boot, Spring Security, PostgreSQL, Docker

[Live Demo](#) | [GitHub Repository](#) | [Case Study](#)

- Spatial OS UI:** Engineered a high-performance in-browser spatial desktop environment featuring a custom Virtual File System (VFS) and resizable, draggable window managers.
- Sub-50ms AI Mutations:** Developed a custom, rule-based Natural Language Processing (NLP) parser in the Spring Boot service layer to parse chat prompts and mutate database records, reducing transaction latency to **under 50ms**.
- Stateless Security:** Implemented secure user authentication using Spring Security and stateless JWT tokens, protecting private API routes and maintaining session integrity.

Succession AI — Real-Time WebSocket Interview Sandbox

Next.js 16, Spring Boot, WebSockets (STOMP), OpenAI API

[Live Demo](#) | [GitHub Repository](#) | [Case Study](#)

- Low-Latency WebSockets:** Engineered a full-duplex communication layer using STOMP over WebSockets (SockJS) to handle real-time chat and coding sandbox events, dropping latency to **under 10ms**.
- Dynamic AI Prompts:** Integrated OpenAI Chat Completion API with structured JSON output to parse candidate resumes, extract core competencies, and dynamically generate technical questions in real-time.

DexterStore — Decoupled E-Commerce Marketplace

React, Spring Boot, Hibernate ORM, REST APIs, PostgreSQL

[Live Demo](#) | [GitHub Repository](#)

- Decoupled Architecture & ACID Persistence:** Designed a decoupled system separating a React storefront from a transactional Spring Boot backend. Managed transactions using Hibernate ORM to ensure cart persistence.

EDUCATION & PROFESSIONAL TRAINING

Java Full-Stack Development Certification

Jan 2025 — Present (Expected 2026)

Qspiders — Chennai, India

- Completed 500+ hours of professional training in Core Java, Advanced Database Design, Spring Boot APIs, and React client-side architectures.

Bachelor of Science in Information Technology (B.Sc. IT)

2022 — 2025

SRNY College of Arts and Science — Tenkasi, India

- Focused on computer networking, database management systems (DBMS), Object-Oriented Programming (OOP), and software engineering principles.
