

# L. NITHISH KUMAR

## JAVA FULL-STACK DEVELOPER

📍 Chennai, Tamil Nadu, India    📞 +91 8015855656    ✉ agentnithish233@gmail.com    🌐 [Portfolio](#)    📄 [GitHub](#)    🔗 [LinkedIn](#)

### PROFESSIONAL SUMMARY

Results-driven **Java Full-Stack Developer** with expertise in modern software engineering, scalable web architectures, and client-side performance optimization. Proven capability in designing, building, and deploying high-throughput, low-latency applications using **Java, Spring Boot, React, Next.js**, and **PostgreSQL**. Highly proficient in event-driven systems (WebSockets), microservices, RESTful API engineering, local-first state persistence, and AI API integrations. Passionate about clean code, robust backend security, and crafting high-fidelity user interfaces.

### TECHNICAL SKILLS

- Backend Engineering:** Java (Core & Advanced), Spring Boot, Spring Security, Spring Data JPA, Hibernate ORM, RESTful APIs, Microservices, WebSockets (STOMP/SockJS), JWT Authentication.
- Frontend Development:** JavaScript (ES6+), TypeScript, React (v19), Next.js (v16), Tailwind CSS (v4), Framer Motion, HTML5, CSS3, State Management (Context API, Redux).
- Databases & Storage:** SQL, PostgreSQL, Neon.tech, MySQL, LocalStorage API, Database Normalization, Index Optimization, Transaction Management (ACID).
- DevOps & Tools:** Git, GitHub, Docker Containerization, Vercel, Netlify, Render, GitHub Pages, IntelliJ IDEA, VS Code, Postman, Vite.
- AI & Automation:** OpenAI API Integration, Natural Language Processing (NLP) Command Parsers, Prompt Engineering, n8n Automation, AI Agent Pipelines.

### FEATURED SOFTWARE PROJECTS

#### SubShield — Local-First SaaS Expense Command Center *React 19, Tailwind CSS v4, Framer Motion, LocalStorage*

[Live Demo](#) | [GitHub Code](#) | [Case Study](#)

- **Zero-Trust Client Architecture:** Architected a 100% local-first subscription defense platform using React 19 and browser LocalStorage, eliminating cloud telemetry and ensuring zero-latency data persistence with 100% privacy.
- **Interactive Bento Command Matrix:** Engineered a Bento UI featuring an automated **Portfolio Health Score algorithm (0-100)**, an interactive **Runway Optimization Simulator slider** for real-time forecasting, and Framer Motion spring physics.
- **Sub-1ms Keyboard Command Palette:** Built a Vercel-inspired ⒻK fuzzy search Command Palette, dynamic brand logo resolution engine (Clearbit API), and 1-click cancellation assistant portal integration, reducing search latency to **under 1ms**.

#### QuantumOS — Spatial SaaS & AI-Powered Workspace *React, Spring Boot, Spring Security, JPA, PostgreSQL, Docker*

[Live Demo](#) | [GitHub Code](#) | [Case Study](#)

- **Spatial OS UI:** Engineered a high-performance in-browser spatial desktop environment featuring a custom Virtual File System (VFS) and resizable, draggable window managers.
- **Sub-50ms AI Mutations:** Developed a custom, rule-based Natural Language Processing (NLP) parser in the Spring Boot service layer to parse chat prompts and mutate database records, reducing transaction latency to **under 50ms**.
- **Stateless Security:** Implemented secure user authentication using Spring Security and stateless JWT tokens, protecting private API routes and maintaining session integrity.

#### Succession AI — Real-Time WebSocket Interview Sandbox *Next.js 16, Spring Boot, WebSockets (STOMP), OpenAI API*

[Live Demo](#) | [GitHub Code](#) | [Case Study](#)

- **Low-Latency WebSockets:** Engineered a full-duplex communication layer using STOMP over WebSockets (SockJS) to handle real-time chat and coding sandbox events, dropping latency to **under 10ms**.
- **Dynamic AI Prompts:** Integrated OpenAI Chat Completion API with structured JSON output to parse candidate resumes, extract core competencies, and dynamically generate technical questions in real-time.

#### DexterStore — Decoupled E-Commerce Marketplace *React, Spring Boot, Hibernate, REST APIs, PostgreSQL*

[Live Demo](#) | [GitHub Code](#)

- **Decoupled Architecture:** Designed a decoupled system separating a React storefront from a transactional Spring Boot backend. Managed database transactions using Hibernate ORM to ensure cart persistence.

### EDUCATION & PROFESSIONAL TRAINING

#### Java Full-Stack Development Certification

Qspiders — Chennai, India

Jan 2025 — Present (Expected 2026)

- Completed 500+ hours of professional training in Core Java, Advanced Database Design, Spring Boot APIs, and React client-side architectures.

**Bachelor of Science in Information Technology (B.Sc. IT)**

**2022 — 2025**

*SRNY College of Arts and Science — Tenkasi, India*

- Focused on computer networking, database management systems (DBMS), Object-Oriented Programming (OOP), and software engineering principles.
