PROFESSIONAL SUMMARY

Performance-driven **Java Full-Stack Developer** with extensive expertise in building enterprise-grade, low-latency, scalable web applications and microservices architectures. Highly skilled across the full software development lifecycle (SDLC), specializing in **Java 17/21, Spring Boot 3, Spring Security, REST APIs, Microservices, React 19, Next.js 16, TypeScript**, and **PostgreSQL**. Proven track record in designing event-driven systems (WebSockets/STOMP), local-first state persistence engines, ACID-compliant database schemas, and AI API integrations. Passionate about system design, clean architecture, automated testing, and delivering high-fidelity digital products.

TECHNICAL SKILL MATRIX & KEYWORDS

BACKEND & MICROSERVICES

Java (17/21), Spring Boot 3, Spring Security 6, Spring Data JPA, Hibernate ORM, RESTful APIs, Microservices, WebSockets (STOMP/SockJS), JWT Security, Connection Pooling (HikariCP).

DATABASES & STORAGE

PostgreSQL, Neon.tech, MySQL, SQL, Redis, LocalStorage API, Database Normalization, Index Tuning, ACID Compliance, Transaction Management.

AI INTEGRATION & SYSTEM DESIGN

OpenAI API Integration, Natural Language Processing (NLP) Command Parsers, Structured JSON Prompt Engineering, System Architecture, Multithreading, Concurrency, Design Patterns (Factory, Builder, Singleton, Observer).

FRONTEND ARCHITECTURE

JavaScript (ES6+), TypeScript, React 19, Next.js 16 (App Router), Tailwind CSS v4, Framer Motion, State Management (Context API, Redux Toolkit), Virtual DOM Optimization.

DEVOPS, CLOUD & TOOLS

Git, GitHub, Docker Containerization, CI/CD Workflows, Vercel, Netlify, Render, Linux Shell, IntelliJ IDEA, VS Code, Postman, Vite.

FEATURED SOFTWARE ENGINEERING PROJECTS

SubShield — Local-First SaaS Expense Command Center

React 19 • Tailwind v4 • Framer Motion • LocalStorage

[Live Demo](#) | [GitHub Code](#) | [Case Study](#)

- Zero-Trust Client Architecture:** Architected a 100% client-side subscription defense engine using React 19 and browser LocalStorage, eliminating cloud server telemetry and ensuring 100% privacy with zero data latency.
- Interactive Bento Cockpit & Health Radar:** Built a dynamic Bento Matrix featuring an automated **Portfolio Health Score algorithm (0-100)**, an interactive **Runway Optimization Simulator slider** for multi-year financial forecasting, and Framer Motion spring physics.
- Sub-1ms Fuzzy Command Palette:** Developed a Vercel/Linear-inspired ⒻⒼⒾⒼⒾ Command Palette modal, dynamic brand logo resolution pipeline (Clearbit API), and 1-click cancellation portal assistant, reducing search latency to **under 1ms**.

QuantumOS — Spatial SaaS & AI-Powered Workspace

Java 17 • Spring Boot 3 • Spring Security • PostgreSQL • Docker

[Live Demo](#) | [GitHub Code](#) | [Case Study](#)

- Spatial Desktop VFS:** Engineered a high-performance in-browser spatial desktop environment featuring a custom Virtual File System (VFS) and resizable, draggable window managers.
- Sub-50ms AI Mutations:** Built a custom rule-based Natural Language Processing (NLP) parser in the Spring Boot service layer to execute database mutations directly from chat prompts, reducing transaction latency to **under 50ms**.
- Stateless Security:** Implemented Spring Security JWT authentication and role-based route protection, safeguarding private API endpoints and maintaining session integrity.

Succession AI — Real-Time WebSocket Interview Sandbox

Next.js 16 • Spring Boot • STOMP WebSockets • OpenAI API

[Live Demo](#) | [GitHub Code](#) | [Case Study](#)

- Low-Latency STOMP WebSockets:** Engineered a full-duplex WebSocket communication layer (STOMP/SockJS) connecting Next.js clients to a Spring Boot broker, handling chat and coding events in **under 10ms**.
- Structured AI Prompt Pipeline:** Integrated OpenAI Chat Completion API with structured JSON schema output to parse candidate resumes, extract core competencies, and generate technical questions dynamically.
- Interactive Syntax Sandbox:** Developed an in-browser coding sandbox featuring real-time syntax validation, code execution pipelines, and recruiter analytics dashboards.

DexterStore — Decoupled E-Commerce Marketplace

React • Spring Boot • Hibernate ORM • REST APIs • PostgreSQL

[Live Demo](#) | [GitHub Code](#)

- Decoupled Architecture & ACID Persistence:** Designed a decoupled system separating a cacheable React storefront from a transactional Spring Boot backend. Managed transactions using Hibernate ORM to ensure cart persistence.

EDUCATION & PROFESSIONAL TRAINING

Java Full-Stack Development
Certification

Qspiders — Chennai, India

Jan 2025 — Present

B.Sc. in Information Technology

SRNY College of Arts and Science — Tenkasi, India

2022 — 2025

Completed 500+ hours of intensive full-stack engineering training covering Core/Advanced Java, Spring Boot REST APIs, SQL Optimization, and React architectures.

Core Focus: Computer Networks, Database Management Systems (DBMS), Data Structures & Algorithms, Object-Oriented Programming (OOP).

 SEARCH LATENCY:  DB MUTATIONS:  WEBSOCKET LATENCY:  DATA PRIVACY: 100%  PRODUCTION UPTIME:
