EXECUTIVE SUMMARY

Results-driven **Java Full-Stack Developer** specialized in building high-throughput, low-latency web applications and local-first software architectures. Proven capability in engineering enterprise solutions using **Java**, **Spring Boot**, **React (v19)**, **Next.js (v16)**, and **PostgreSQL**. Proficient in event-driven systems (WebSockets), microservices, RESTful API design, local state persistence, and AI API integrations. Passionate about writing clean, maintainable code, robust backend security, and high-fidelity user interfaces.

TECHNICAL EXPERTISE

BACKEND ENGINEERING

Java (Core & Advanced), Spring Boot, Spring Security, Spring Data JPA, Hibernate ORM, RESTful APIs, Microservices, WebSockets (STOMP/SockJS), JWT Security.

FRONTEND ARCHITECTURE

JavaScript (ES6+), TypeScript, React (v19), Next.js (v16), Tailwind CSS (v4), Framer Motion, HTML5, CSS3, State Management (Context API, Redux).

DATABASES & STORAGE

SQL, PostgreSQL, Neon.tech, MySQL, LocalStorage API, Database Normalization, Index Optimization, ACID Transactions.

DEVOPS & TOOLING

Git, GitHub, Docker Containerization, Vercel, Netlify, Render, GitHub Pages, IntelliJ IDEA, VS Code, Postman, Vite.

AI & INTEGRATION

OpenAI API Integration, Natural Language Processing (NLP) Parsers, Prompt Engineering, n8n Automation Workflows, AI Agent Pipelines.

FEATURED SOFTWARE ENGINEERING PROJECTS

SubShield — Local-First SaaS Expense Command Center

[Live App Demo](#) | [GitHub Code](#) | [Case Study](#)

- Zero-Trust Client Architecture:** Architected a 100% local-first subscription defense platform using React 19 and browser LocalStorage, eliminating cloud telemetry and ensuring zero-latency data persistence with 100% privacy.
- Interactive Bento Command Matrix:** Engineered a Bento UI featuring an automated **Portfolio Health Score algorithm (0-100)**, an interactive **Runway Optimization Simulator slider** for real-time forecasting, and Framer Motion spring physics.
- Sub-1ms Keyboard Command Palette:** Built a Vercel-inspired ƆK fuzzy search Command Palette, dynamic brand logo resolution engine (Clearbit API), and 1-click cancellation assistant portal integration, reducing search latency to **under 1ms**.

[React 19](#) • [Tailwind v4](#) • [Framer Motion](#) • [LocalStorage](#)

QuantumOS — Spatial SaaS & AI-Powered Workspace

[Live App Demo](#) | [GitHub Code](#) | [Case Study](#)

- Spatial OS UI:** Engineered a high-performance in-browser spatial desktop environment featuring a custom Virtual File System (VFS) and resizable, draggable window managers.
- Sub-50ms AI Mutations:** Developed a custom, rule-based Natural Language Processing (NLP) parser in the Spring Boot service layer to parse chat prompts and mutate database records, reducing transaction latency to **under 50ms**.
- Stateless Security:** Implemented secure user authentication using Spring Security and stateless JWT tokens, protecting private API routes and maintaining session integrity.

[React](#) • [Spring Boot](#) • [Spring Security](#) • [PostgreSQL](#) • [Docker](#)

Succession AI — Real-Time WebSocket Interview Sandbox

[Live App Demo](#) | [GitHub Code](#) | [Case Study](#)

- Low-Latency WebSockets:** Engineered a full-duplex communication layer using STOMP over WebSockets (SockJS) to handle real-time chat and coding sandbox events, dropping latency to **under 10ms**.
- Dynamic AI Prompts:** Integrated OpenAI Chat Completion API with structured JSON output to parse candidate resumes, extract core competencies, and dynamically generate technical questions in real-time.

[Next.js 16](#) • [Spring Boot](#) • [WebSockets \(STOMP\)](#) • [OpenAI API](#)

DexterStore — Decoupled E-Commerce Marketplace

[Live App Demo](#) | [GitHub Code](#)

[React](#) • [Spring Boot](#) • [Hibernate ORM](#) • [PostgreSQL](#)

- **Decoupled Architecture:** Designed a decoupled system separating a React storefront from a transactional Spring Boot backend. Managed database transactions using Hibernate ORM to ensure cart persistence.

EDUCATION & CERTIFICATIONS

Java Full-Stack Development Certification

Jan 2025 – Present (Expected 2026)

Qspiders — Chennai, India

- Undergoing 500+ hours of professional training in Core Java, Advanced Database Design, Spring Boot APIs, and React client-side architectures.

Bachelor of Science in Information Technology (B.Sc. IT)

2022 – 2025

SRNY College of Arts and Science — Tenkasi, India

- Focused on computer networking, database management systems (DBMS), Object-Oriented Programming (OOP), and software engineering principles.
